FOR IMMEDIATE RELEASE

Charah Solutions Finalizing Execution of Agreement with TMPA for the Acquisition, Remediation and Redevelopment of Gibbons Creek Steam Electric Station and Reservoir

Will Provide Turnkey Environmental Risk Transfer Services to Remediate Existing Ash Ponds and Landfills and Redevelop Property; The Coal Plant Will Not Be Restarted and Will Begin the Decommissioning Process

LOUISVILLE, KY (September 24, 2020) – [Charah® Solutions, Inc.](#) (NYSE: CHRA) (the “Company”), a leading provider of environmental and maintenance services to the power generation industry, today announced that it is negotiating an Asset Purchase Agreement with the [Texas Municipal Power Agency](#) (TMPA) to acquire, remediate and redevelop the Gibbons Creek Steam Electric Station and Reservoir in Grimes County, Texas (“Gibbons Creek”). TMPA, which was created to supply electricity on a wholesale basis to its member cities of Bryan, Denton, Garland and Greenville, operated Gibbons Creek from its construction in 1982 until 2018.

As part of this agreement, Charah Solutions, through its subsidiary Gibbons Creek Environmental Redevelopment Group, LLC (GCERG), will take ownership of the 6,166 acre area which includes the closed power station, the 3,500 acre reservoir, dam and spillway and assume all environmental responsibilities. GCERG will be responsible for the shutdown and decommissioning of the coal power plant as well as performing all environmental remediation work for the site landfills and ash ponds.

As a sustainability leader in utility services for over 30 years, Charah Solutions is dedicated to preserving natural resources in an environmentally conscious manner through projects such as this with TMPA. Sustainability is a Charah Solutions core value, and the Company focuses its business on developing innovative solutions to complex environmental issues for the betterment of the planet, the communities in which it operates and its customers.

According to Scott Sewell, Charah Solutions President and CEO, “Our Environmental Risk Transfer services represent an innovative solution designed to meet the evolving and increasingly complex needs

of our utility partners. Many utilities are experiencing an increased need to retire and decommission older or less economically viable generating assets while minimizing costs and maximizing the value of the assets and improving the environment. This is a perfect example of Charah Solutions providing a custom approach for these complex projects, as we are able to provide not only the environmental remediation expertise needed to meet regulations but also bring the right partners to the table to redevelop the property while creating local jobs and lowering the cost for our utility partner.”

GCERG's site redevelopment options do not include a restart of the coal plant but do include renewable energy, agricultural, commercial or industrial redevelopment opportunities. The Gibbons Creek Reservoir RV Park and campground will continue to operate going forward as it is a very popular recreational destination for local lake enthusiasts, regularly drawing over 200 people per day.

“We are pleased to work with Charah Solutions to reduce the environmental risk and costs for TMPA and its member cities and ratepayers while redeveloping the plant and property to expand economic activity and support the tax base, including the Grimes County Schools,” said Bob Kahn, TMPA General Manager. “The transaction will save member cities millions in expenses associated with decommissioning and environmentally remediating the plant site.”

About Charah Solutions, Inc.

With 30 years of experience, Charah® Solutions, Inc. is a leading provider of environmental and maintenance services to the power generation industry, with operations in fossil fuel and nuclear power generation sites across the country. Based in Louisville, Kentucky, Charah Solutions assists utilities with all aspects of managing and recycling ash byproducts generated from the combustion of coal in the production of electricity as well as routine power plant maintenance and outage services for the fossil fuel and nuclear power generation industry. The Company also designs and implements solutions for ash pond management and closure, landfill construction, fly ash sales, and structural fill projects. Charah Solutions is the partner of choice for solving customers' most complex environmental challenges, and as an industry leader in quality, safety, and compliance, the Company is committed to reducing greenhouse gas emissions for a cleaner energy future. GEUS became the first municipally-owned electric utility in Texas in 1891. 110 years later it became the first municipally-owned cable television and high speed Internet operation in Texas. GEUS offers these services to the 26,000 plus consumer\owners living in the Greenville, Texas area located approximately 50 miles East of Dallas, Texas. GEUS is uniquely governed by an autonomous board of trustees that is appointed by the Greenville City Council. Steps were taken by the Texas Legislature in 1989 to allow this type of governing structure.
